Re : GPO - R2R

Cedar's brief calls for a Global Process Owner who can hold the full R2R landscape together across a PE-backed group: standardising process, tightening governance, and syncing with the S2P, O2C, H2R, Tax, FP&A and External Reporting owners while D365 and Tipalti reshape the automation stack. That kind of end-to-end ownership, under commercial and regulatory pressure, is where I've spent most of my career.

At CNP, I rebuilt investment accounting production under Solvency II constraints: 350bn euros in assets, delivered in 18 months, on schedule, with close and reconciliation controls that a regulator would test. Elsewhere, I've taken fast-close redesign from diagnosis to production, tightening controls around IFRS 9 and IFRS 17 reporting while working directly with Finance, Actuarial, IT and Risk stakeholders who rarely agree on priorities. I've also led SimCorp Dimension and Clearwater Analytics implementations from design through go-live, the kind of platform change D365 and Tipalti represent here.

I haven't used D365 or Tipalti directly. My platform depth is SimCorp and Clearwater, and the governance and control logic transfers directly.

Hybrid working across time zones has been routine for me since my last Clearwater engagement, so the 2/3 days in London pattern isn't a change. As a contractor who is a non-UK Tax resident, based overseas, IR35 does not apply to me. Worth a call to see how this maps to your R2R priorities?
