Re : Senior Manager (Asset & Wealth Management Consulting) - Paris

Alpha's growth since the Bridgepoint acquisition puts real pressure on the Asset & Wealth Management practice: more clients, more complex Target Operating Model reviews, and a need for people who can run these engagements without hand-holding. That's the gap I'd fill.

At CNP Assurances, I rebuilt the investment accounting production chain under Solvency II constraints, 350 billion euros in assets under management, delivered in 18 months, on time, with the sub-ledger reconciling to the general ledger daily instead of monthly. That's the kind of Middle/Back Office redesign work this role asks for, done under regulatory scrutiny rather than in a greenfield environment. On the systems side, I've taken SimCorp Dimension and Clearwater Analytics implementations from design through to production, including the data migration and UAT phases that usually break these projects: cleaning up suspense accounts, building the cutover interfaces, writing the OD generation logic in VBA rather than leaving it to manual rework. That maps directly onto the Distribution, Portfolio Management and outsourcing themes in your brief. I've also run the stakeholder side of these programs, keeping Finance, Actuarial, IT and Risk aligned when priorities conflict, which is where most transformation projects actually stall.

I work as an independent consultant today, but I'm open to a permanent role here, either from day one or after an initial period on assignment. Happy to walk through any of these projects in more detail on a call.

Xavier Robitaille
