I bring 25 years of insurance and finance expertise to roles where technical depth, regulatory clarity, and delivery discipline matter most. I've spent my entire career at the intersection of Finance, Actuariat, and Operations—the zone where complexity actually lives.

My most relevant recent work: I led the financial closing redesign for a €2B+ insurance operation, cutting close cycles from 12 to 6 days while embedding new IFRS 17 controls. That meant aligning three separate P&L reporting models, retraining 40 controllers, and designing governance that stuck. I also served as interim Finance Manager for a mid-sized mutual insurer restructuring its CFO office—rebuilt their management reporting from scratch, fixed their regulatory submission process, and reduced month-end variance by 70%.

I know the gap here clearly: I've been independent since 2022, and this role likely expects someone in seat fulltime. I work best on interim or contract basis (3–18 months), but I'm genuinely interested in whether there's flexibility on structure or if you're looking for pure permanent hire. Worth clarifying upfront so we both know what we're talking about.

If the mission involves finance transformation, PMO, or business-critical reporting under regulatory pressure, I'll add measurable value fast. Happy to walk through specifics on a call.
