I bring 25 years of insurance and finance expertise—the rare combination of technical depth, operational delivery, and the ability to move complex stakeholders together. I excel where regulatory constraints, financial rigor, and execution pressure converge. That's where I add the most value.

My last two engagements show this clearly. At a major French insurer, I led the redesign of their closing process and regulatory reporting framework across three entities—cutting close cycles by 35% while embedding stronger controls for Solvency II compliance. At another, I rebuilt their PMO governance structure and delivered a €40M operating model transformation on time, managing alignment between Finance, Actuariat, and IT through quarterly board reviews.

I work best on high-stakes, time-bound mandates where clarity and discipline matter more than politics. I'm equally comfortable as interim Finance Manager, Business Analyst, or PMO lead—the role matters less than the mission.

One fair point: I'm structured as an independent consultant (Expert Zone Advisory SAS). If you need permanence or full-time commitment, that's worth discussing upfront. But if you need someone who can hit the ground in week one and deliver at senior level without onboarding overhead, I'm the fit.

I'm open to conversation. Calendly link above, or call me directly at +33 6 64 89 09 43.
