Dear Hiring Manager,

I'm applying for the Consultant Transformation role at CNP Assurances Protection Sociale. With 25 years in insurance and finance, I bring the exact skill mix your transformation directorate needs: PMO discipline, business analysis depth, and the ability to move stakeholders across Finance, Actuariat, IT, and Operations when execution matters.

Over the past decade, I've led programme delivery on the kinds of initiatives you're building—operating model redesigns, process harmonization, and regulatory reporting overhauls in complex insurance environments. Most recently, I've structured governance frameworks and chaired steering committees where clarity on scope, risk, and timeline made the difference between mediocre delivery and real change adoption. I've consolidated multi-million budgets, flagged dependency issues early, and animated workshops that actually solved problems rather than generate slides.

What matters: I know insurance. I understand where the tension lives—between actuarial precision, compliance requirements, and operational feasibility. That shared language accelerates everything.

One honest point: I've worked primarily as a senior consultant and interim leader on fixed mandates. This CDI role represents a shift toward embedded, long-term transformation ownership. That's the right move for me at this stage, and it means you get someone committed to seeing initiatives through to run-state and user adoption, not just handoff.

I'd welcome a brief call to explore how I can strengthen your transformation delivery. You can reach me at +33 6 64 89 09 43 or xro@xavier-robitaille.com.

Best regards,

Xavier Robitaille
