Re : Fund Operations Specialist (Backoffice - FA/CUS) - Limited to 24 months (f/m/d)

Overseeing fund accounting and custody providers across a European operating model, while keeping SLAs, escalation paths and review boards disciplined enough to survive an audit, is a governance job as much as an operational one. That combination, technical depth plus provider discipline, is where the Fund Operations Specialist role gets interesting.

At CNP Assurances, I rebuilt investment accounting production under Solvency II constraints on 350bn€ of assets under management, delivered in 18 months, on schedule, with reconciled data ready for regulatory audit. That work depended on the same mechanics this role needs: tight SLA/KPI tracking with external providers, escalation processes that actually get followed, and documentation clean enough to hand to an auditor without rework. I've also run SimCorp Dimension and Clearwater Analytics implementations end to end, including data migration, UAT and clearing of suspense accounts, which means I know what breaks in a fund accounting handoff before it becomes an escalation. Negotiating service agreements and moderating provider review boards is familiar territory from that same governance work.

My provider oversight experience sits mostly on the insurance investment side rather than EU retail fund administration specifically, so the regulatory wrapper would be new, the operational logic isn't. Hybrid working is standard practice for me, as it was throughout my Clearwater engagement.

Happy to walk through the CNP delivery in more detail on a call.
