I bring 25 years of insurance and finance expertise—the kind that lives at the intersection of technical rigor, regulatory constraint, and delivery pressure. Most teams need someone who can translate between Finance, Actuariat, IT, and Risk without losing either the detail or the narrative. That's where I add the most value.

My last three significant mandates illustrate the pattern. I led a CFO office restructuring for a €2B+ insurer—redesigned closing processes, cut month-end cycle time by 35%, and built the control framework that stuck post-engagement. Before that, I managed a multi-year regulatory reporting transformation (IFRS 17 preparation) across three entities, coordinating 40+ stakeholders and delivering on a fixed timeline. Most recently, I designed and ran PMO governance for a claims platform migration that touched 200+ staff and €1.2M in annual spend.

I work best on fixed-term, high-stakes missions where clarity of scope and discipline matter more than politics. I'm not looking to embed as internal staff—I'm structured as an independent consultant (Expert Zone Advisory SAS) and prefer 6–18 month engagements with defined exit points.

If the role is interim leadership, transformation design, or PMO delivery in insurance or financial services, let's talk specifics. You can reach me at xro@xavier-robitaille.com or +33 6 64 89 09 43.
