Re : Senior Funds Manager - International Player, 140K

Overseeing fund administration across private equity, real estate and private debt strategies, with direct client exposure and daily coordination with auditors, lawyers and banks, that's a role built on delivery discipline under complexity, not just technical fund accounting knowledge.

At CNP, I rebuilt the investment accounting production line under Solvency II constraints, covering 350 billion euros in assets under management, and delivered the redesign in 18 months, on time, with the sub-ledger reconciled against the general ledger at every close. I also led a Clearwater Analytics implementation end to end, from design through to production, which is the same system used across much of the fund administration space you're describing, and it required the same discipline: clean data migration, UAT sign-off, and closing processes that hold up under audit scrutiny. Separately, I've built VBA-based tools to clear suspense accounts and construct accounting entries during system cutovers, work directly relevant to keeping fund accounting deadlines intact when third parties and internal teams depend on the same data.

I haven't managed fund administration teams under Luxembourg's CSSF framework specifically. My regulatory grounding is French and Solvency II based, not Luxembourg fund regulation, though the accounting and governance disciplines overlap closely.

Hybrid work is how I've operated for years, including throughout the Clearwater project, so remote coordination with a 20-person team isn't a new adjustment. Happy to set up a call to go through the details.
