Re : Fund Operations Specialist (Backoffice - FA/CUS) - Limited to 24 months (f/m/d)

Overseeing fund accounting and custody providers while keeping SLAs, escalation processes and audit trails airtight is a governance job as much as an operational one. That combination, provider oversight plus regulatory discipline, is where I've spent most of my career.

At CNP Assurances, I rebuilt the investment accounting production line under Solvency II constraints, 350 billion euros in assets, delivered in 18 months, on time, with reconciled data ready for audit at every close. That work depended on the same discipline this role asks for: clean handoffs between fund accountants, custodians and internal teams, and documentation that holds up when regulators or auditors ask for it. On another mandate I ran the data migration and interface cutover for a securities sub-ledger, including UAT and suspense account clean-up, which is the kind of project-related initiative your team drives alongside its oversight work. I've also negotiated service agreements and chaired governance boards with external providers, so organizing and moderating review boards isn't new territory.

Remote and hybrid setups are how I've worked for years. My last engagement with Clearwater Analytics ran fully distributed across time zones, so cross-border coordination from Niederanven poses no adjustment.

Happy to walk through how this maps to your Fund Operations team on a short call.
