Dear Hiring Manager,

I bring 25 years of finance and insurance experience—the last decade spent leading fund accounting, regulatory reporting, and financial close operations across complex multi-entity environments. This role fits squarely within my core strengths: preparing accurate NAV calculations, managing capital events, and coordinating audits under tight deadlines.

In my last two roles, I rebuilt fund accounting processes from scratch. At one PE fund administrator, I designed and implemented NAV workflows for 12 simultaneous funds (€2.3B AUM), reducing close timelines by 35% while tightening control frameworks. I've lived the details you describe—trial balance reviews, waterfall validation, preferred return calculations, journal entry controls, and the coordination chaos of year-end audits. I know how to spot errors before they reach investors and how to escalate complexity without creating bottlenecks.

I also understand the Real Assets space. My experience includes illiquid asset accounting, dealing with appraisals, drawdown schedules, and the nuance of GAAP versus IFRS interpretations that trips up generalists. I've actively participated in client onboarding calls and built dashboards and footnote disclosures that actually communicated fund economics clearly.

One honest point: you're hiring a 3-month contract, and I typically work as a senior independent consultant. But I'm actively available now, I work best in entrepreneurial settings where things move fast, and a structured interim assignment—especially one this clearly defined—suits me. You get someone who won't need training on the fundamentals and will leave your controls tighter than they were.

I'm in Luxembourg regularly and happy to start quickly.

Warm regards,
Xavier Robitaille
