

Senior Finance Transformation Leader

August 15, 2026

Re : De nouvelles offres d'emploi correspondent à vos préférences.

Finance Transformation Leads at this level sit where operating model design, technology delivery and regulatory pressure meet, and where CFOs need someone who can run the programme and hold the room with senior stakeholders. That is the space I have worked in for 25 years, across insurance and finance.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, coordination with the depositary CACEIS, alongside building a Data Warehouse for investments (fields, table structure, input and output controls). Both programmes ran with the operating model and governance questions this role covers, not just the technical build.

More recently, as senior programme director at Clearwater, I ran several parallel implementations of a R to R SaaS solution, with monthly sponsor committees at senior management level and consolidated tracking of deliverables, milestones and resources on Monday.com, including for the Luxembourg client Luxempart. At SCOR, I spent four years, two of them as chief transformation officer of the investment function, which put me in front of the same operating model and stakeholder alignment questions this role addresses. On the delivery side, I built the Insurance BU at Primexis from scratch: 20 people, 10 clients, €3m in revenue, and a seat on the executive committee, so the business development side of a consulting-led role is not new ground either.

I am certified in Generative AI Primer (Vanderbilt, 2026) and GenAI for Account Executives (Yale, 2026), and I now run most of my own consulting work through AI agents on Claude and GPT, which is directly relevant to the Finance Technology, Data, Automation and AI dimension of this role.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to the transformation programmes this role covers.

Best regards,
