

Dear Hiring Manager,

I'm writing to apply for the Manager Transformation Finance – Insurance role at RSM Paris.

****Why this role, why now****

I've spent 25 years in insurance and finance transformation—nothing else. I've closed complex accounting periods under regulatory pressure, redesigned finance processes across business and IT teams, and delivered multi-year programmes where clarity and execution discipline made the difference. RSM's CFO Advisory mission resonates directly: I've lived the space where accounting rigor, regulatory compliance, and operational transformation collide.

****What I bring****

At Expert Zone Advisory (my consulting firm since 2018), I've led similar engagements for insurance clients—process redesign, SAP implementations, IFRS 17 readiness, regulatory reporting improvements. One client reduced month-end close from 8 days to 3 by rethinking controls and automation; another stabilized their actuarial-to-finance handoff, eliminating reconciliation bottlenecks worth €200K annually in rework. I'm comfortable at the table with CFOs, finance directors, and heads of operations because I speak their language and deliver on commitments.

****The honest part****

I've been freelance for 8 years—I own my own firm. A return to a structured role matters to me now for different reasons: I want to build something durable within an established practice, mentor teams rather than drive solo delivery, and be part of a culture that actually values human-centred work (not just markets it). RSM's 95% recommendation rate and what your team members say in the brief tells me this isn't performance theatre.

****Next step****

I'm ready to talk through recent work, how I'd approach your client base, and what this role needs to succeed. You can reach me at xro@xavier-robitaille.com or +33 6 64 89 09 43.

Best,

Xavier Robitaille
