Dear Hiring Manager,

I'm applying for the External Reporting Manager role at Tokio Marine HCC because the scope—regulatory filings, Solvency II submissions, ledger control, audit coordination—aligns precisely with where I've added the most value over 25 years in insurance.

I've spent the last decade managing exactly this kind of reporting infrastructure through periods of transition. At AXA, I led the redesign of a Luxembourg entity's closing process across GAAP, local statutory, and regulatory templates, cutting month-end cycle time by 35% while tightening controls. More recently, I've worked with specialty insurers on CAA submissions and Solvency II quantitative reporting—the technical detail and deadline discipline this demands is something I do well. I don't oversell process improvement; I focus on what actually lands: accuracy, timeliness, and a control environment that holds under audit pressure.

The 12-month contract structure works for me. I operate as a senior interim consultant through Expert Zone Advisory, so I'm built for fixed-term delivery without the friction of transition to permanent employment. I'm based in France but have worked across London and Luxembourg before—the location and contract length are straightforward.

What I'll bring: hands-on execution (not supervision), fluent technical Dutch/French/English, and a track record of getting regulatory submissions right the first time. What you should know: I'm a generalist within finance and insurance, not a narrowly specialized technician, so I'll bring perspective on how reporting connects to the broader business—but my primary job is to deliver your reporting cycles flawlessly.

I'm ready to move quickly. You can reach me at xro@xavier-robitaille.com or +33 6 64 89 09 43 to discuss the handover timeline and what the first 30 days should cover.
