Re : Fund Finance Director Private Equity Fund

Allbyn's fund finance function sits across a multi-vehicle structure where NAV integrity, audit discipline and administrator oversight all have to hold while the function adopts AI and system automation. That combination is exactly where I want to put 25 years of experience in insurance and in finance to work.

As senior programme director at Clearwater Analytics, I ran several implementations of a SaaS R to R solution in parallel, including for Luxempart in Luxembourg, with monthly sponsor committees at executive level and consolidated tracking of deliverables, milestones and resources on Monday.com. That work was largely remote and cross-border, which is how I operate day to day: hybrid setups, distributed teams, tools built for that rhythm.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting on €350bn in assets, taking SimCorp Dimension from design to go-live in 18 months. That kind of reporting discipline at scale, across multiple cycles and stakeholders, maps directly onto the quarterly and annual reporting cadence across Allbyn's vehicles.

At Coface, I rolled out IFRS 9 in stages over four years: POC cycles, ECL methodology, accounting schemes, UAT, and coordination with the depositary CACEIS, alongside building an investment Data Warehouse covering field definitions, table structure and input/output controls. That's the same discipline auditors expect when financial statements need to match GAAP requirements and the underlying data stays audit-ready.

Certified in Generative AI Primer (Vanderbilt, 2026) and GenAI for Account Executives (Yale, 2026), I now automate most of my own operations through AI agents under Claude or GPT, which translates directly into driving AI adoption across a fund reporting framework.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to Allbyn's fund finance function in Luxembourg.

Best regards,

Xavier Robitaille
