Re : PMO Consultant – Securities Transformation Program

Taleo Consulting is running a securities transformation programme where governance discipline determines whether Testing, Migration, Go-Live and Hypercare land on schedule. That kind of PMO backbone is where I add value.

At Clearwater, I worked as senior programme director, running several parallel implementations of a R to R SaaS solution, with monthly sponsor committees at senior management level and consolidated tracking of deliverables, milestones and resources on a dedicated tool (Monday.com), including for a Luxembourg client, Luxempart. That work was fully remote, and it gave me a solid grounding in the discipline distributed teams need: clean reporting cadence, tight documentation, and steering committees that run as well over video as in person.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months, which required the same kind of milestone tracking and cross-team coordination this programme calls for, between IT, Finance and business stakeholders. At Coface, IFRS 9 was rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the custodian, CACEIS, work that sits close to the custody, settlement and reference data processes named in your programme.

Luxembourg is also a market I know directly through the Luxempart engagement, which makes stepping into a securities transformation programme there a natural continuation rather than a new context to learn.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to your Testing and Go-Live phases specifically.

Best regards,

Xavier Robitaille
