Re : Senior Fund Accounting Specialist

SEI Lux administers funds for third-party managers in a high-growth segment built around alternative and private market strategies, with NAV production, expense and fee calculations, and regulatory reporting to Fund Boards and the CSSF at the center of the job. That combination of investment accounting precision and regulatory delivery is where I have spent most of my career.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the depositary, CACEIS. I also built the investment Data Warehouse there, defining the fields, table structure, and input/output controls that fed the accounting and reporting chain. More recently, as senior programme director at Clearwater, I ran several parallel implementations of a SaaS R2R solution, with monthly executive-level sponsor committees and consolidated tracking of deliverables, milestones, and resources on Monday.com, including for Luxempart, a Luxembourg-based client. That last engagement also means I already work comfortably in a hybrid setup, coordinating distributed teams and client stakeholders without friction.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this investment accounting and regulatory reporting background applies to the fund administration work at SEI Lux.

Best regards,

Xavier Robitaille
