Dear Hiring Manager,

I'm writing to explore the PMO Senior role at UTi Group supporting your client's insurance transformation program.

****Why this fit matters****

You need someone who understands both portfolio governance mechanics and insurance operating realities. I've spent 25 years in insurance and finance—not in PMO theory, but in delivering transformations where regulatory constraints, budget discipline, and stakeholder alignment make or break outcomes. That intersection is where I add most value. For this mission, that means I can speak credibly to your business stakeholders while building governance rigor that actually sticks.

****Concrete proof****

At a major French insurer, I led PMO for a €40M multi-year transformation covering systems, processes, and organizational redesign. I owned portfolio consolidation across 15+ initiatives, tracked burn against regulatory reporting deadlines, and built the governance structure to keep Finance, Actuariat, and IT aligned monthly. The program delivered on time. More recently, I've architected portfolio dashboards and causal forecasting models for CFO offices—the kind of analytics that let you spot capacity conflicts and budget slippage before they become crises.

On the Agile/Lean side: I've embedded in scaled Agile environments and pushed teams toward OKR-based value tracking rather than velocity theater. It works when the PMO genuinely understands prioritization, not just cadence.

****Honest note****

I'm freelance, not looking for CDI. That means I bring focus and urgency to delivery, but you'll want clarity upfront on contract structure and timeline expectations.

****Next step****

I'm based near Paris; Lille works well. Let's talk about the program scope and your governance maturity baseline. You can reach me at +33 6 64 89 09 43 or xro@xavier-robitaille.com.

Best regards,
Xavier Robitaille
