Re : Senior Manager - Consolidation and Group Reporting

Alter Domus sits at the center of group consolidation and external reporting for a portfolio that spans 90% of the top 30 private markets asset managers. Getting month-end, quarter-end, and year-end close right at that scale, across multi-currency entities rolling up into group-level IFRS financials, is exactly the kind of problem where I add value.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That work required the same discipline this role calls for: owning a close process end to end, coordinating inputs from multiple stakeholders against fixed deadlines, and making sure the output holds up under audit and regulatory scrutiny.

At Coface, IFRS 9 was rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the depository CACEIS. I also built the investment Data Warehouse there, defining fields, table structure, and input/output controls, while leading a team of 16. That combination, technical accounting depth plus team leadership plus stakeholder coordination, maps closely to what this role needs on disclosure evaluation, controller coordination, and audit management.

As senior programme director at Clearwater, I ran several parallel SaaS R2R implementations remotely, with monthly sponsor committees at executive level and consolidated tracking of deliverables, milestones, and resources on Monday.com, including for a Luxembourg client, Luxempart. Hybrid delivery and distributed teams are a normal part of how I work, and I bring the same rigor to a Luxembourg-based role with international stakeholders.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to Alter Domus' group reporting function.

Best regards,

Xavier Robitaille
