Dear Hannover Re Hiring Team,

I bring 25 years in insurance and finance—all of it hands-on in transformation, finance operations, and regulatory reporting. This role sits exactly where I add the most value: bridging Finance, IT, and complex stakeholder alignment under real delivery pressure.

What you need is someone who understands both the technical depth of Record-to-Report architectures and the organizational realities of leading teams through change. I've spent the last decade doing exactly that—most recently designing and executing finance operating model changes for multi-billion EUR groups, leading cross-functional teams through IFRS17 and Solvency II implementations, and managing the IT-Finance interface on consolidation and reporting platforms.

One concrete example: I led the redesign of a consolidated finance-IT operating model for a major European insurer, restructuring the reporting chain, standardizing financial processes across 8 countries, and delivering a 40% efficiency gain in the close cycle. That work required exactly what this role demands—deep process knowledge, ability to identify automation and standardization leverage points, credibility with both Finance and IT teams, and the discipline to deliver within cost and timeline constraints.

I'm fluent in German and English, comfortable with financial architectures (.NET environments, system integration), and can read technical requirements the way Finance needs them translated. The honest gap: I've worked as an independent consultant and interim leader for the past five years rather than in a permanent role. I'm actively seeking to anchor back into a structured organization where I can build something durable with a team.

I'd welcome a conversation about how my experience maps to your Finance Global Services challenge. I'm available at xro@xavier-robitaille.com or +33 6 64 89 09 43.

Best regards,
Xavier Robitaille
