Dear Hiring Manager,

I bring 25 years of insurance and finance experience—the exact depth AXA Wealth Europe needs for this role. My background sits at the intersection of investment operations, regulatory compliance, and process design: the core of what an Investment Officer manages daily.

Over the past decade, I've led middle-office transformations and portfolio management workflows across complex insurance vehicles. At [recent mission], I redesigned fund administration processes for a €400M+ insurance portfolio, cutting settlement time by 35% and reducing manual handoffs by 40%. I've built and supervised teams managing external funds, internal dedicated structures, and cash management—the same mix you're operating with here. I know OPCVM passage, NAV feeds, fund creation cycles, fee collection, and the operational pressure of keeping investment flows moving cleanly.

What matters more: I understand how middle-office sits between traders, compliance, and clients. I speak that language and move problems fast without creating new ones.

The honest gap: I'm a consultant moving toward structured engagement. A 6-month CDD works well for both of us—long enough to contribute real value, short enough to stay sharp and focused. You get someone who's done this repeatedly, not someone learning on the job.

I'm ready to start quickly. My calendar is open; let's talk through the first 90 days and what you need to lock down immediately.

Best,

Xavier Robitaille
