Re : Consolidation Lead

Running a consolidation and financial close program that holds up under IFRS and local GAAP scrutiny, with intercompany eliminations clean enough for statutory reporting, takes someone who has closed the books themselves, sat in front of Group Finance stakeholders, and configured the solution end to end. That's the mix Henderson Drake needs for this Paris team.

At CNP, I rebuilt the investment accounting production line under Solvency II constraints: 350 billion euros of assets, delivered on time over 18 months, with the accounting schemes and sub-ledger reconciliations feeding both statutory and regulatory reporting. On another engagement, I redesigned the close process, cutting reconciliation cycles and tightening controls across finance and actuarial handoffs. I've also run data migration and accounting cleanup projects, from cahiers des charges through UAT, building automated journal entries in VBA to clear suspense accounts before go-live.

I haven't worked hands-on with a dedicated EPM consolidation platform; my system depth is in SimCorp Dimension and Clearwater Analytics, on the investment side.

I currently work as an independent consultant but I'm open to a permanent role in Paris, either from day one or after an initial mission-based period. Happy to talk this week if that timing works for you.
