I bring 25 years of insurance and finance expertise to complex transformations where technical depth, regulatory constraints, and execution discipline matter most. I've spent my entire career at the intersection of finance operations, PMO delivery, and business change—the exact space where most organizations struggle to find clarity.

On a recent interim mandate with a €2B+ insurance group, I redesigned their financial closing process across 12 entities, cutting month-end variance by 60% and embedding new control frameworks that stuck after I left. That same year, I led a regulatory reporting overhaul for a mid-cap asset manager that reduced compliance risk by moving from manual workarounds to systematic data governance—no consultant theater, just working code and people who knew what to do next.

I'm currently positioned as an independent consultant through Expert Zone Advisory. I work best on focused 6-18 month mandates where I can own a clear outcome—process redesign, PMO setup, transformation program management, regulatory delivery. I'm built for interim roles and contractual engagements; I'm not looking to shift into permanent employment structure unless the role is genuinely exceptional.

If this brief matches what you're solving for, I'm easy to reach at +33 6 64 89 09 43 or xro@xavier-robitaille.com. I keep calendly open for quick calls—no friction, no pitch deck. I'll either be useful or I won't.
