Dear Hiring Manager,

I bring 25 years of insurance and finance experience directly aligned with your EPM transformation needs. My background combines deep technical expertise in performance management systems with PMO discipline and the ability to bridge Finance, IT, and Operations stakeholders—exactly what this role requires.

Over the past decade, I've led similar deployments across leading insurers. Most recently, I designed and deployed a consolidated reporting architecture using Oracle Essbase and Planning for a mutual insurer managing €2B+ in assets. The project involved parameterizing multi-dimensional models, establishing data governance workflows, and migrating legacy Excel processes to automated solutions. I managed 15+ cross-functional stakeholders, delivered on a constrained timeline, and achieved 40% reduction in month-end closing cycles. I also led a Power BI rollout across actuarial and risk teams—handling the data layer design, refresh architecture, and user adoption.

I work fluently in Essbase (calculation scripts, outline design, incremental aggregations), SQL (ETL and query optimization), and have deployed Board and Planning across insurance operations. I understand MCO discipline and the difference between project delivery and long-term system stewardship.

The honest gap: I'm structured as an independent consultant, not traditionally employed. I work best on outcomes—clear scope, measurable targets, autonomous execution. I'm genuinely interested in this role because Harmonie's scale and regulatory complexity are where I do my strongest work, and the opportunity to own both deployment and ongoing optimization aligns with how I like to operate.

I'm available to discuss how my track record translates to your solvency and capital reporting roadmap.

Best regards,
Xavier Robitaille
