

Senior Manager Insurance Finance Transformation

August 26, 2026

Re : De nouvelles offres d'emploi correspondent à vos préférences.

Ensur works exclusively with insurance finance departments, redesigning operating models, coordinating regulatory change and implementing systems for Belgium's top 15 insurers and major brokers. That focus, and the scale of these projects, is where I want to put 25 years in insurance and in finance to work.

As senior programme director at Clearwater Analytics, I ran several parallel implementations of a SaaS R2R solution, with monthly sponsor committees at senior management level and consolidated tracking of deliverables, milestones and resources on a dedicated tool (Monday.com). One of these engagements was for Luxempart, in Luxembourg.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months.

IFRS 9 at Coface was rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the custodian CACEIS. I also created an investment data warehouse there, covering fields, table structure, and input and output controls.

Building the insurance business unit at Primexis, from scratch, gave me 20 people, 10 clients, €3m in revenue, and a seat on the executive committee. That combination of programme delivery, regulatory depth and practice building matches what your role covers, from finance transformation and Solvency II or IFRS 17 change to coaching junior consultants and growing the firm.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience could support Ensur's insurance finance transformation practice.

Best regards,

Xavier Robitaille
