Re : Senior Project Manager - Specialized Finance & Contract Management

Tryg is consolidating Specialized Finance capabilities across the Nordics under the CFO office, spanning Tax, Capital and Solvency Planning, Investments and Treasury, and Statutory and Regulatory Reporting. That combination of regulatory depth and cross-functional delivery is exactly where I want to work.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That project ran across Finance, Actuarial, IT and Risk stakeholders, with the same governance discipline this role calls for: milestones, risk tracking, and executive-level reporting on a multi-year regulatory build.

At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the custodian CACEIS. I also built the investment Data Warehouse from scratch there, defining fields, table structure, and input/output controls. Both required the same stakeholder mix Tryg describes: Finance, Legal, Risk, IT and external advisors aligned around a single regulatory outcome.

As senior programme director at Clearwater, I ran several parallel implementations of an R to R SaaS solution, with monthly sponsor committees at executive level and consolidated tracking of deliverables, milestones and resources on Monday.com. One of those engagements was for Luxempart, a Luxembourg-based client, which involved the same kind of multi-stakeholder, cross-border coordination this Nordic mandate requires.

Four years at SCOR, two of them as chief transformation officer of the investment function, gave me direct exposure to the intersection of capital planning, investment governance and regulatory reporting that sits at the center of this role.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to the Specialized Finance transformation at Tryg.

Best regards,

Xavier Robitaille
