Letter of Motivation – Business Consultant, Asset Management – Luxembourg

Dear Hiring Manager,

I'm applying for the Business Consultant role in Asset Management & Securities Services at Aurexia because the scope—process optimization, regulatory compliance, operational transformation—sits squarely where I've delivered the most impact over 25 years in finance.

My value to your team comes down to three things: (1) I've spent a decade deep in asset servicing, fund accounting, and custody operations across multiple geographies. I speak both the business and compliance language fluently—CSSF, UCITS/AIFMD, fund NAV workflows, TA reconciliations are not abstractions. (2) I deliver at pace. I've led three major process redesigns in regulated environments where failure wasn't an option; delivered on time, within scope, with client sign-off. (3) I move between stakeholder worlds easily—Fund Accounting teams, IT, Risk, Compliance—without losing technical rigor. That matters when you're bridging operating model changes or selecting and implementing new platforms.

A concrete example: I recently supported a Luxembourg fund administrator through a dual transformation—consolidation of four fund accounting teams onto a new FA platform, plus redesign of the entire NAV control framework. Nine-month delivery, zero regulatory incidents, 30% efficiency gain. That's the kind of outcome I produce when client and technical requirements actually align.

One honest point: I've been independent for the last three years. I'm now looking to embed in a structured consulting environment where I can apply what I know to multiple clients systematically, and grow within a team. Aurexia's model and Sopra Steria's platform appeal to me for exactly that reason.

I'm based in the Paris region, hold strong Luxembourg operational networks, and can start within two weeks of offer.

Happy to discuss any aspect of this application.

Best regards,

Xavier Robitaille
