Re : Fund Operations Specialist (Backoffice - FA/CUS) - Limited to 24 months (f/m/d)

Fund oversight in Luxembourg's retail fund business runs on the quality of the SLA and the discipline behind escalation, not on the contract's fine print. That's the piece your Fund Operations team is asking someone to own, particularly with providers and internal teams sitting on different sides of the same review board.

I've spent 25 years inside insurance and asset management back-office chains, most of it where fund accounting, custody and regulatory reporting collide. On a Solvency II investment accounting rebuild for a French insurer, I redesigned the sub-ledger reconciliation process between the custodian feed and the general ledger, covering 350 billion euros in assets, and closed a recurring break that had been sitting in suspense accounts for two closing cycles. On a Clearwater Analytics implementation, I ran the UAT phase and negotiated data delivery timelines directly with the custodian's operations team, which is the same kind of provider governance and review board moderation this role asks for. I also built the acceptance test scripts and CDC documentation that auditors later used as the reference for the migration.

Hybrid work has been my default setup since the Clearwater engagement, remote-first with providers and internal teams spread across time zones, so the cross-border and flexible-hours model here isn't new territory.

I'd be glad to walk through how this maps to your review board and escalation structure on a call.
