Re : Senior Accountant F/M - Insurance - LU878093

Luxembourg's insurance sector runs on tight regulatory discipline, and this role sits right at the intersection I know best: statutory closing, CAA reporting, and Solvency II production for entities that answer to a demanding regulator.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That work sat exactly where accounting and prudential reporting meet, which is the daily reality this position describes for its finance department. At Coface, I built a Data Warehouse for investments (field definitions, table structure, input and output controls) and rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the custodian CACEIS. That experience covers both the technical accounting side and the cross-team coordination this role asks for with Actuarial, Risk, Compliance, and Audit.

My most recent engagement, as senior programme director at Clearwater, ran fully in a hybrid setup: I managed several parallel SaaS R to R implementations, including for the Luxembourg client Luxempart, with monthly sponsor committees at senior management level and consolidated tracking of deliverables, milestones, and resources on a dedicated tool (Monday.com). Remote and hybrid coordination across finance, IT, and business teams is not new territory for me; it is how I have run programmes for the last several years, and I would bring the same discipline to this Luxembourg-based team regardless of how much of the work happens on site.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period, given the scope and long-term nature of this position.

I would be happy to discuss how this experience applies to the entities you are expanding the Finance department around.

Best regards,

Xavier Robitaille
