Re : Fund Operations Specialist (Backoffice - FA/CUS) - Limited to 24 months (f/m/d)

Overseeing fund accounting and custody providers across a European operating model, with review boards, SLA governance, and audit-ready reconciliations sitting at the center of the role: that's a specific kind of operational discipline, not a generic back-office brief.

At CNP, I rebuilt the investment accounting production line under Solvency II constraints, covering 350 billion euros in assets, delivered in 18 months and on schedule. That work meant negotiating handoffs between fund accountants, custodians, and internal control teams, exactly the kind of provider oversight and escalation management this role calls for. On a separate migration project, I ran data cutover and account clearing between legacy and target ledgers, building the reconciled documentation packages auditors needed to sign off. I also designed SLA and KPI frameworks for accounting production teams, the same governance layer this position is meant to maintain for fund accountants and custodians in Luxembourg.

My exposure to EU retail fund business sits more on the accounting and reporting side than on distribution or fund structuring, worth naming directly since the role touches both.

Hybrid work is standard practice for me. My last assignment with Clearwater Analytics ran fully in that mode, coordinating across time zones and provider teams without friction. Happy to walk through how these pieces map to the Niederanven team's priorities on a call.
