I bring 25 years of insurance and finance expertise directly into the problems where technical depth, regulatory constraints, and delivery pressure collide. As an interim finance manager and PMO lead, I've built my reputation solving the work that sits at the intersection of Finance, Actuariat, and IT—where most organizations struggle to align.

My value is straightforward: I move fast without cutting corners, I speak both languages (CFO and CTO), and I own delivery. I don't need onboarding on insurance or regulatory reporting. I know what Solvency II means operationally. I've closed books under pressure. I've redesigned processes that saved teams weeks per cycle.

On my last three engagements, I led the redesign of a group's month-end closing (cut cycle time by 30%, reduced manual controls by 40%), rebuilt the PMO governance for a mid-sized insurer's digital transformation (60+ initiatives, 15M+ budget tracked), and set up regulatory reporting infrastructure for post-M&A consolidation. Numbers matter because they show the work is real and the impact is measurable.

One fair note: I'm built for interim and consulting roles, not permanent employment. That's not a constraint for the right assignment—it's why I can move fast and own outcomes without organizational friction. If you need someone who knows insurance inside out, delivers on schedule, and doesn't require hand-holding on the technical or regulatory side, I'm worth a conversation.
