Re : Change Management & Program Director | USA (Remote)

Enterprise-scale EPM/CPM transformation demands a delivery leader who can run multiple complex workstreams at once while keeping executive sponsors aligned on risk, budget, and adoption. That is the exact shape of work I have built my practice around.

At Clearwater, I worked as senior programme director, running several parallel implementations of a R to R SaaS solution, each with monthly sponsor committees at general management level, and a consolidated view of deliverables, milestones, and resources on a dedicated tool (Monday.com). One of those engagements was for Luxempart, a Luxembourg-based client. At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That kind of scale, multiple stakeholder groups, a fixed regulatory deadline, and a platform migration running underneath it, is the environment where programme governance either holds or breaks.

At Coface, IFRS 9 was rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the depositary bank CACEIS. I also built the investment Data Warehouse there, defining the fields, table structure, and input/output controls. Both required managing consultants, architects, and internal teams together, the same multi-disciplinary setup this role calls for.

25 years in insurance and finance, all of it at the intersection of technical complexity, regulatory pressure, and delivery discipline, is what I would bring to a CPM/EPM practice built on OneStream.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to your OneStream client base.

Best regards,

Xavier Robitaille
