Re : Finance Change Consultant (Financial Reporting) 12m FTC

Intact Insurance is rebuilding its financial reporting processes as part of a broader finance transformation, with ERP and data migration decisions still ahead. That kind of programme needs someone who has actually specified the requirements and lived through the go-live, not just advised around it.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That work covered exactly the kind of functional and technical requirement specification this role calls for, across a programme with the same reporting and data migration stakes.

At Coface, IFRS 9 was rolled out in stages over four years: successive POCs, the ECL methodology, the accounting schemes, UAT, and coordination with the custodian CACEIS. I also built a Data Warehouse for investments there, covering field definitions, table structure, and input/output controls, the same data discipline that underpins a clean ERP migration.

More recently, as senior programme director at Clearwater, I ran several parallel SaaS implementations of an R to R solution for clients including Luxempart, with monthly senior sponsor committees and consolidated tracking of deliverables, milestones, and resources on Monday.com. That mission was fully remote and hybrid, and remote delivery is now a normal part of how I work.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period. As a contractor who is a non-UK Tax resident, based overseas, IR35 does not apply to me.

I would be happy to discuss how this experience applies to the ERP and data migration workstream at Intact Insurance.

Best regards,

Xavier Robitaille
