

Keyridge Asset Management

July 31, 2026

Re : Vice President of Financial Systems

Keyridge brings together Canada Life Asset Management's external funds business, Setanta Asset Management, and Irish Life Investment Managers under one regulatory umbrella spanning the Central Bank of Ireland, the FCA, and the SEC. Integrating financial planning, reporting, and accounting platforms across that many jurisdictions, while keeping data accurate and consistent for decision-making, is exactly the kind of systems challenge I have spent the last decade building.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That project required the same discipline this role calls for: defining requirements with Finance, Actuarial, and IT, then holding a delivery plan across a large, regulated balance sheet.

At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, the ECL methodology, accounting schemes, UAT, and coordination with the custodian CACEIS. Alongside that, I built a Data Warehouse for investments, defining the fields, table structure, and input/output controls. That work speaks directly to the enterprise-level financial process design this role needs.

More recently, as senior programme director at Clearwater, I ran several parallel implementations of a SaaS record-to-report solution, with monthly sponsor committees at executive level and consolidated tracking of deliverables, milestones, and resources on Monday.com, including for Luxempart in Luxembourg. That combination of vendor management, governance, and cross-jurisdiction stakeholder work maps closely onto what Keyridge needs from this role.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to Keyridge's financial systems.

Best regards,

Xavier Robitaille
