Re : Interim Finance Transformation Lead

This role calls for a hands-on operator who can sit inside a finance function, get more out of an existing ERP, and leave behind documented, repeatable processes rather than a slide deck. That kind of execution work, close to the CFO, close to the systems, is where I've spent most of my career.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That work started from the same starting point this mandate describes: manual, dependent processes that needed structure, automation, and a system used to its full potential. At Coface, IFRS 9 rolled out in stages over four years, with successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the custodian CACEIS. I also built the investment Data Warehouse there, defining fields, table structures, and input/output controls, work that maps directly onto the SOPs, governance, and metrics this position needs around NetSuite. As senior programme director at Clearwater, I ran several parallel SaaS R to R implementations, including for the Luxembourg client Luxempart, with monthly executive sponsor committees and consolidated tracking of deliverables, milestones, and resources on Monday.com.

I haven't worked in NetSuite specifically, but the pattern here, order-to-cash, procure-to-pay, record-to-report, moving an organization from founder-led habits to a disciplined operating model, is the same one I've run repeatedly across ERP implementations and finance transformations in insurance and finance. Certified in Generative AI Primer (Vanderbilt, 2026) and GenAI for Account Executives (Yale, 2026), I now automate most of my own consulting work through AI agents under Claude or GPT, which is directly usable for the automation and reporting goals in this mandate.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period, and a 3-month interim mandate fits naturally with how I work.

I would be happy to discuss how this experience applies to the NetSuite optimization work at hand.

Best regards,
