Re : Senior Transformation Leader with Insurance experience

N Consulting Global's client is modernising the Lloyd's and London market estate: consolidating platforms after acquisitions, embedding AI in a regulated environment, and integrating core finance with policy, claims and settlement systems. That's the kind of transformation mandate I want to take on next.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the custodian CACEIS, alongside building a dedicated investment Data Warehouse (field structures, table design, input and output controls). Both mandates combined systems integration, regulatory reporting and platform stabilisation under live production constraints, close to what this role needs on the broking and settlement side.

As senior programme director at Clearwater, I ran several parallel SaaS R2R implementations, including for the Luxembourg client Luxempart, with monthly sponsor committees at executive level and consolidated milestones and resources tracked on Monday.com. That mandate ran fully hybrid, and distributed governance across time zones and stakeholder groups is now a standard part of how I deliver. At SCOR, I spent four years in the reinsurance business, two of them as chief transformation officer of the investment function, which gives me direct exposure to the reinsurance layer this estate spans. PMP-certified since 2025, and certified in Generative AI Primer (Vanderbilt, 2026) and GenAI for Account Executives (Yale, 2026), I now automate most of my own delivery work through AI agents under Claude or GPT.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period. As a contractor who is a non-UK Tax resident, based overseas, IR35 does not apply to me.

I would be happy to discuss how this background in platform consolidation and regulatory reporting could support this Lloyd's modernisation programme.

Best regards,

Xavier Robitaille
