Re : Program Manager / Sr. Project Manager

Pinnacle Method's client needs a program manager who can hold together a mid-to-large scale initiative with varying complexity, high visibility, and multiple stakeholders across IT and business teams, while keeping documentation, requirements, and testing on track through PMBOK and BABOK discipline.

That is the kind of program I have run for the past 25 years in insurance and in finance. As senior programme director for Clearwater Analytics, I piloted several parallel R to R SaaS implementations, with monthly sponsor committees at executive level and a consolidated view of deliverables, milestones, and resources on Monday.com, including the Luxembourg client Luxempart. At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting schemes, user acceptance testing, and coordination with the custodian CACEIS. I also built the investment Data Warehouse there, defining the fields, table structure, and input and output controls.

PMP certified since 2025, I bring the same rigor to project documentation, scope, schedules, and budgets that this role calls for, built on Word, Excel, Visio, and MS Project across every mission.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this program management experience across insurance and finance translates to your client's initiative.

Best regards,

Xavier Robitaille
