Re : Senior PMO Analyst

Large technology programmes in complex, regulated environments live or die on governance discipline: clean status reporting, tight financial tracking, and dependencies that don't slip through the cracks. That's the specific gap this role covers, and it matches how I've spent the last decade of my work.

At Clearwater, as senior programme director, I ran several parallel implementations of an SaaS R to R solution, with monthly sponsor committees at senior management level and consolidated tracking of deliverables, milestones, and resources on a dedicated tool (Monday.com), including a Luxembourg-based client, Luxempart. That work was hybrid by default: governance packs, status reporting, and stakeholder communication across time zones, largely from a distance, with the same rigor as onsite. At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months, a project that required the same governance and financial controls this role calls for. At Coface, the IFRS 9 rollout ran in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the custodian CACEIS, which meant producing management information for senior stakeholders on a recurring basis and keeping action logs and dependencies current across finance, IT, and operations.

Banking and insurance share the same regulatory pressure and the same need for reporting that senior leadership can trust without having to double-check it. I'm comfortable in the Microsoft ecosystem (Excel, PowerPoint, SharePoint, Copilot) and I've automated most of my own operations with AI agents under Claude and GPT, which is directly useful for dashboard and MI pack production.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this governance experience applies to the programme you're supporting in Dublin.

Best regards,

Xavier Robitaille
