Re : Head of Transformation

Regional financial services groups that have finished experimenting with AI now have to reorganise around it, and that work depends on someone the board, the technologists and the workforce all trust. That is the mandate this role describes, and it is where I want to put 25 years of transformation experience in insurance and in finance.

At SCOR, I spent four years, two of them as chief transformation officer of the investment function, turning board ambition into funded, sequenced programmes and running the change with the teams who had to live with it. At Coface, IFRS 9 was rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the depositary CACEIS. I also built a Data Warehouse for investments there, covering fields, table structure, and input and output controls.

As senior programme director at Clearwater, I ran several parallel SaaS R to R implementations, including for the Luxembourg client Luxempart, with monthly sponsor committees at executive level and deliverables, milestones and resources tracked on a dedicated tool (Monday.com). That mission was fully remote; hybrid delivery is a normal working mode for me.

I am certified in Generative AI Primer (Vanderbilt, 2026) and GenAI for Account Executives (Yale, 2026), and I now run most of my consulting activity through AI agents under Claude and GPT, enough to be fluent with the current AI stack at decision-maker level without needing to build it myself. The logic behind MAS-style governance is close to what I delivered inside Solvency II reporting. At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period. As a contractor who is a non-UK Tax resident, based overseas, IR35 does not apply to me.

I would be happy to discuss how this experience applies to the group's AI transformation roadmap.

Best regards,

Xavier Robitaille
