Re : Transformation Manager

A multi-year P&C core platform transformation across Benelux, board-sponsored, with a multi-vendor ecosystem and executive-level governance: this is the kind of program where architectural discipline and delivery discipline have to hold together at the same time, across regional and global stakeholders.

At CNP, I led exactly that kind of complexity end-to-end. I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting on €350bn in assets, taking SimCorp Dimension from design to go-live in 18 months. That program required the same discipline this role calls for: phased roll-out, scope control, and steering committees where business and technology priorities had to be reconciled without slowing delivery.

At Coface, IFRS 9 was rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the custodian CACEIS. I also built the investment Data Warehouse there, from field design to input and output controls, while managing a team of 16. That kind of multi-year, multi-stakeholder rollout is close in shape to what you describe for the P&C platform: architectural consistency has to survive contact with local realities.

More recently, as senior programme director at Clearwater, I ran several parallel SaaS Record-to-Report implementations, including for Luxempart, with monthly sponsor committees at executive level and consolidated tracking of deliverables, milestones, and resources on a dedicated tool (Monday.com). That mission was fully remote and cross-border, which is how most of my work runs today. Hybrid setups and distributed teams are not a constraint for me. They're the default mode I operate in.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to the Benelux roll-out and its multi-vendor governance.

Best regards,

Xavier Robitaille
