

Crossing Hurdles

July 31, 2026

Re : Finance Project Manager | Remote

Crossing Hurdles works at the point where AI labs need finance-specific data pipelines run with the discipline of a real finance operation, not a generic annotation shop. That combination of technical rigor and stakeholder management across senior finance experts is where I can add value immediately.

At Clearwater, as senior programme director, I ran several parallel implementations of an R to R SaaS solution, with monthly sponsor committees at senior management level and consolidated tracking of deliverables, milestones, and resources on a dedicated tool (Monday.com). That role was fully remote, across time zones and stakeholder groups, which is the same operating rhythm this position asks for.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. Managing that scale of financial data pipeline, with strict accuracy and audit requirements, maps directly onto the finance-specific data pipeline work described in this role.

At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting entries, UAT, coordination with the custodian CACEIS. I also built a Data Warehouse for investments there, covering field definitions, table structure, and input/output controls, with a team of 16 people. That is the kind of ground-up build, under real deadline pressure, that this role calls for.

Certified in Generative AI Primer (Vanderbilt, 2026) and GenAI for Account Executives (Yale, 2026), I now run nearly all of my own consulting operations through AI agents on Claude and GPT, which fits directly with a role built around AI Lab clients and data pipeline efficiency.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period. As a contractor who is a non-UK Tax resident, based overseas, IR35 does not apply to me.

I would be happy to discuss how this experience applies to your current finance data pipeline projects.

Best regards,
