Re : Transformation Program Director

A multi-year transformation of core P&C platforms across the Benelux region, delivered under joint COO/CTO sponsorship with a multi-vendor landscape and a mandate for standardisation over localisation, is exactly the kind of programme where design discipline and executive alignment decide the outcome.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That is the same design-to-go-live accountability this programme needs, at platform scale.

As senior programme director for Clearwater Analytics, I ran several parallel implementations of an R to R SaaS solution, with monthly sponsor committees at executive level and consolidated deliverables, milestones and resources managed on a dedicated tool (Monday.com). One of those engagements was Luxempart, a Luxembourg-based client, which gave me direct exposure to Benelux governance and stakeholder expectations.

At Coface, IFRS 9 was rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, and coordination with the depositary CACEIS. That is the multi-vendor, multi-stakeholder rhythm this role calls for, sustained over years rather than months.

Hybrid delivery is not new territory for me either. The Clearwater programmes ran largely remote, and I keep the same governance rigor whether the sponsor committee is in the room or on a call.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to the Benelux P&C transformation.

Best regards,

Xavier Robitaille
