Re : Fund Operations Specialist (Backoffice - FA/CUS) - Limited to 24 months (f/m/d)

Overseeing fund accounting and custody providers across a European operating model, with SLAs, KPIs and review boards that actually hold up under audit scrutiny, is a governance job as much as an operations one. That's the part of this role that stands out.

I've built and run exactly that kind of oversight in insurance and asset management contexts. At CNP, I rebuilt investment accounting production under Solvency II constraints, 350 billion euros in assets, delivered in 18 months and on time, which meant setting up the reconciliation logic and control points that let auditors trust the numbers without re-checking every line. On a separate engagement, I led a SimCorp Dimension implementation from design through go-live, negotiating scope and service commitments directly with the platform provider while managing internal stakeholders across finance, actuarial and IT, the same mix of technical depth and stakeholder pressure this position asks for. I've also built VBA-driven reconciliation tools to clear aged suspense accounts during system migrations, the kind of detail work that keeps custody and fund accounting data clean enough to support due diligence and audit requests.

Remote and hybrid setups are not new territory for me. My last assignment, with Clearwater Analytics, ran fully in that mode, coordinating providers and internal teams across time zones without losing the rigor a governance function needs.

Happy to walk through the CNP and SimCorp work in more detail if useful.
