

Director-Senior Project Director

August 19, 2026

Re : De nouvelles offres d'emploi correspondent à vos préférences.

Moody's Analytics Insurance Life team is modernizing a global actuarial and risk platform while building AI into delivery and governance. That combination of financial services depth, cloud-based product transformation and disciplined portfolio leadership is the kind of programme I want to run next.

As senior programme director at Clearwater Analytics, I ran several parallel SaaS record-to-report implementations, including for the Luxembourg client Luxempart, with monthly sponsor committees at general management level and a consolidated view of deliverables, milestones and resources on a dedicated tool (Monday.com). At SCOR, I spent four years in the investment function, two of them as chief transformation officer, coordinating change across finance, actuarial and IT stakeholders.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: 350bn euros in assets, SimCorp Dimension from design to go-live, delivered in 18 months. At Coface, I rolled out IFRS 9 in stages over four years, POC cycles, ECL methodology, accounting schemes, UAT, coordination with the depositary CACEIS, and I built a dedicated investment Data Warehouse: field definitions, table structure, input and output controls.

I completed the full examination track of the Centre d'Études Actuarielles (2004), which gives me the technical grounding this role expects on the actuarial side. Certified in Generative AI Primer (Vanderbilt, 2026) and GenAI for Account Executives (Yale, 2026), I automate most of my own consulting operation through AI agents on Claude and GPT, the same practical use of AI this role asks for in programme delivery.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to the actuarial platform programme.

Best regards,

Xavier Robitaille
