Re : Fund Operations Specialist (Backoffice - FA/CUS) - Limited to 24 months (f/m/d)

Fund oversight in this team means holding fund accountants and custodians to SLAs and KPIs, running review boards with providers, and producing reconciled data for audits and due diligence, all within a 24-month mandate that leaves no room for a slow start.

At CNP, I rebuilt investment accounting production for 350 billion euros of assets under Solvency II constraints, delivering the redesign in 18 months without slipping a single regulatory deadline. That meant negotiating deliverables with external administrators and holding them to defined data quality standards, the same discipline this role expects from provider governance.

I led a Clearwater Analytics implementation from design through production, structuring service scope with the vendor, running UAT cycles, and building the reconciliation logic that later fed audit and due diligence files. That project ran on a hybrid, largely remote setup, which is how I've worked for years now.

I've also run data migrations and cleared aged suspense accounts under tight timelines, work that depends entirely on documentation trails strong enough to survive an audit.

My background sits on the insurance balance sheet side rather than EU retail UCITS funds specifically.

Worth a short call to see where this overlaps best with what your team needs right now.
