Re : Director of Accounting

Leading the Group's monthly close, statutory filings and tax position across multiple countries, while running cash pooling and intercompany flows, takes a finance leader who has already built and rebuilt accounting operations under pressure. That is the challenge this role presents, and it matches the type of work I look for.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That kind of program, spanning accounting, regulatory reporting and system implementation at the same time, is close to what this position asks for across your Group's entities.

At Coface, I rolled out IFRS 9 in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, coordination with the custodian CACEIS. I also built a Data Warehouse for investments there, covering field definitions, table structure, and input and output controls. Both required the same discipline this role needs: keeping local compliance intact while changing the underlying tools, and managing a team through the transition (16 people at Coface).

As senior programme director at Clearwater, I ran several parallel implementations of a R to R SaaS solution, with monthly sponsor committees at senior management level and consolidated tracking of deliverables, milestones and resources on Monday.com. One of these engagements was for Luxempart, a Luxembourg-based client whose finance function spanned several countries, close to the multi-entity setup described in this role.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to your close process and tax perimeter across the Group's countries.

Best regards,

Xavier Robitaille
