LETTRE DE MOTIVATION

Dear FINARIAT,

I'm applying for the Consultant role—Chef de Projet Data & Transformation Digitale—because this mission sits exactly where I add the most value: at the intersection of insurance operations, regulatory compliance, and delivery discipline.

For 25 years, I've worked exclusively in insurance and finance. What matters here is not just the experience span, but what I've learned to do well: untangle complex multi-system environments, align business and IT stakeholders around a single definition of success, and ship projects on time despite regulatory and organizational friction. This project—automating customer data processes, ensuring quality and compliance across fragmented systems—is fundamentally a delivery + governance challenge wrapped in a data layer.

Most recently, I led a program redesign for a major insurer where I cadre'd scope with 12+ business units, mapped end-to-end data flows across three legacy systems, and established the PMO structure to track 18-month delivery. The result: 40% faster data reconciliation, full GDPR alignment, and on-time go-live. That's the kind of work I do consistently.

I should be direct about one thing: I work as a freelance consultant through Expert Zone Advisory (KBIS available). If you need a CDI commitment, I'm not the right fit. If you're open to freelance, portage, or a hybrid structure, I'm ready to start immediately.

I'm based near Paris, comfortable with occasional travel, and my Calendly is open for a 30-minute conversation: calendly.com/xrobitaille/30min.

Best,

Xavier Robitaille
