

VP, Head of Investment Accounting (open to remote)

August 27, 2026

Re : De nouvelles offres d'emploi correspondent à vos préférences.

RGA runs investment accounting across GAAP, statutory, tax, and management reporting bases for a global life and health reinsurance portfolio, with a technology roadmap and vendor governance to own alongside the CIO relationship. That combination of regulatory breadth, systems ownership, and team leadership is where I want to work next.

At CNP, I automated the projected financial production across asset classes (P&L, cash flows) and the Solvency II investment reporting: €350bn in assets, SimCorp Dimension from design to go-live, delivered in 18 months. That mandate covered exactly the kind of investment accounting operating model and technology roadmap this role owns, from data structure through regulatory output.

At Coface, IFRS 9 rolled out in stages over four years: successive POCs, ECL methodology, accounting schemes, UAT, coordination with the depositary CACEIS. I also built the investment Data Warehouse there, defining fields, table structure, and input/output controls, while managing a team of 16. Four years at SCOR, including two as chief transformation officer of the investment function, gave me the reinsurance-specific view of how investment results connect to performance drivers and stakeholder reporting, which maps directly onto this role's mandate to align accounting outcomes with the CIO and senior investment leaders.

As senior programme director for Clearwater implementations, I ran several R to R SaaS rollouts in parallel, with monthly sponsor committees at executive level and consolidated tracking of deliverables, milestones, and resources on Monday.com, including for the Luxembourg-based client Luxempart. That work required the same discipline this role needs for cross-functional initiatives on automation, data quality, and reconciliations.

I operate as an independent consultant today. Nevertheless, I am perfectly open to a permanent role, directly or after an initial engagement period.

I would be happy to discuss how this experience applies to RGA's investment accounting technology roadmap.

Best regards,

Xavier Robitaille
