Re : Transformation Programme Lead

Finatal is bringing in someone to own delivery on a group-wide transformation programme for a PE-backed digital platform: building PMO governance, coordinating Product, Commercial, Finance and HR, and producing board-level dashboards that keep leadership aligned. That combination of technical rigor and cross-functional execution is where I've spent 25 years operating, inside insurance and finance rather than digital platforms.

At CNP, I rebuilt the investment accounting production line under Solvency II constraints across €350bn of assets under management, delivering in 18 months and on schedule, while coordinating Finance, Actuarial and IT teams who had never worked to a shared plan before. On system implementations (SimCorp Dimension, Clearwater Analytics), I've run projects from design through to production go-live: writing the cahiers des charges, running UAT, and reporting progress to steering committees who needed clear, current numbers to make go/no-go calls. I've also led migration and apurement work: clearing legacy suspense accounts and rebuilding chart-of-accounts logic during system cutovers, the kind of unglamorous execution that decides whether a transformation actually lands.

I haven't worked inside a consumer-facing digital or marketplace business. Every one of these programmes ran inside insurance and asset management, not consumer tech.

Happy to walk through how this maps onto your programme on a call.
