I'm a finance transformation specialist with 25 years in insurance and asset management. I've spent my career at the intersection of fund accounting, regulatory compliance, and operational delivery—exactly what you need for this interim role.

My last three years focused on fund finance and middle office redesign: I led the closure of a €2.3B fund portfolio while restructuring NAV production controls for a listed asset manager, cutting month-end close from 15 to 8 days. I've worked across fund accounting, corporate finance, and operations simultaneously—holding NAV oversight, driving strategic projects, and improving controls in parallel. I'm qualified (equiv. to ACA standard), and I've delivered finance transformation in both regulated asset management and insurance environments.

What makes me useful for a period of change: I bring discipline to ambiguous situations. I'm comfortable being a technical leader without needing to own everything long-term. I engage naturally with middle and back office teams because I speak their constraints and language, not just finance shorthand.

I'm available to start immediately. I work best in interim roles where the scope is clear and the pace matters.

Let's talk—I'm ready to move fast.
