Re : Fund Operations Specialist (Backoffice - FA/CUS) - Limited to 24 months (f/m/d)

Overseeing fund accounting and custody providers across an EU retail fund book means the friction usually sits at the handover points: where SLAs get renegotiated, where escalations stall, and where audit teams need reconciled data fast. That's the layer where 25 years in insurance and finance operations translate directly.

At CNP, I rebuilt investment accounting production under Solvency II constraints across 350 billion euros in assets, delivered in 18 months, on schedule, with the reconciliations and control evidence auditors needed built into the process rather than bolted on afterward. Separately, I've run data migrations and interface cutovers between accounting systems, including SimCorp Dimension and Clearwater Analytics, where the real work is closing out suspense accounts and clearing aged reconciling items before go-live, exactly the kind of governance discipline that keeps provider oversight credible when regulators or internal audit come asking. I've also sat across the table from external providers to negotiate service terms and set KPIs that actually get monitored rather than filed away.

I haven't run custody operations for retail funds specifically, though my back office and asset servicing work covers the adjacent ground closely.

Working hybrid and coordinating with distributed teams is routine for me, most recently on a Clearwater engagement run entirely remote. Happy to walk through specifics on a call.
